

I appreciate the opportunity to submit this request for consideration. XM Radio is a wonderful step forward in radio broadcasting. I am urging favorable consideration of this request to continue to allow traffic and weather services via XM Radio.

I live in Atlanta where the traffic is horrendous. The ability to hear the traffic information is vital, and may be life saving. I was trapped in traffic one evening for over 5 hours and with my medical situation, it could have been a very serious situation.

The only way we can hear updated traffic reports here is to listen to politically oriented, all talk, not many brains, radio.

PLEASE give due consideration and include XM radio as a real step forward in radio broadcasting. We want to hear traffic, weather, and any other programs that WE choose, not what the AM/FM stations force on us.
